REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In regard to claim 1, the prior art of record does not teach or suggest:

a clock generating device comprising a clock oscillating section generating a normal clock signal to be supplied to be supplied to the second data input/output device, and a clock wait control section generating a wait clock signal having a cycle which is integer times as much as the normal clock signal has;

and an access arranging device causing the clock oscillating section to stop the normal clock signal to the second data input/output device for one clock cycle,

causing the clock wait control section to supply the wait clock signal to the second data input/output device,

not allowing the second data input/output device to access the data storing device for one clock cycle,

executing the access of the first data input/output device for the one clock cycle when a contention of the access of the first data input/output device for the one clock when a contention of the access of the first data input/output device and the second data input/output device to the data storing device is generated,

and starting the access of the second data input/output device after the access of the first data input/output device for the one clock cycle is ended.

In regard to claim 5, the prior art of record does not teach:

a clock generating device comprising a clock oscillating section generating a normal clock signal for supplying to the second data input/output device, and a clock wait control section generating a wait clock signal having a cycle which is integer times as much as the normal clock signal has,

providing the normal clock signal to the processor and the data input/output device; and
providing the clock wait signal to cause the normal clock signal for the second data input/output device to be stopped for one clock cycle and not allowing the second data input/output device to access the data storing device for one clock cycle when a contention of the access of the first data input/output device and the second data input/output device to the data storing device is generated.

In regard to claims 2-4, & 6-7, the reasons for allowance were stated in the non-final rejection filed 10/01/08.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
